

Contents

Chapter 1 Properties of Numbers

1.1 Commutative and associative properties of addition 1

1.2 Commutative and associative properties of multiplication

5

1.3 Distributive property 9

1.4 Applications to algebra 14

Chapter 2 Problems Leading to Linear Equations

2.1 Linear equations 17

2.2 Problems involving rates 21

2.3 Problems involving averages and weighted averages 29

Chapter 3 Systems of 2 x 2 Linear equations

3.1 Algebraic solution of 2 x 2 systems 39

3.2 Problems giving rise to 2x2 systems 43

Chapter 4 Operations with Algebraic Expressions

4.1 Expansion of products 47

4.2 Factorization 50

4.3 Reduction of fractions 55

4.4 Multiplication of fractions 57

4.5 Addition of fractions 60

Chapter 5 Fractional and Literal Equations

Section 5.1 Fractional equations 68

5.2 Literal equations 72

Chapter 6 Some Geometric Problems

6.1 Areas of common figures 75

6.2 Pythagorean theorem 91

Chapter 7 Quadratic Equations

7.1 Factorable case 97

7.2 Solution by extraction of square root 100

7.3 Quadratic formula 104

(ii)

Chapter 8 Linear relations

8.1 Special case 108

8.2 The general case 116

Chapter 9 Properties of Exponents and Square Roots

9.1 Properties of exponents 122

9.2 Scientific notation 127

9.3 Properties of square roots 131

Answers to Selected Problems 134
